

# Enjoy the Ripples

of value flowing through your organization with enterprise machine translation.

Employees using free online machine translation (MT) tools to communicate and collaborate may be putting your company at serious risk.

Gain control of your data now with secure enterprise machine translation and add value across the organization.

## Top 5 Reasons Why Enterprises Rely on Machine Translation for Global Expansion

1

# 1000s

of daily transactions needn't be sent to free online tools.

A powerful and scalable enterprise-grade MT provides secure and robust translations for exclusive use.

2

# 30%

reduction in translation overheads for support content.

Customer service teams can significantly cut the cost of producing all content across languages and channels.

3

# 50%

decrease in bounce rates.

This can be achieved when web properties have native language content to drive global online user activity and by automatically translating online content, such as user reviews.

4

# 100%

of your staff can communicate with each other.

Make it happen by providing the tools for international employees to collaborate across regions.

5

# 30%

increase in productivity.

This comes through teams being able to translate more content with the same resources or by adding MT into the translation workflow.

Get MT value flowing.

See if you can enjoy the peace of mind that comes from enterprise machine translation.
