

Language Weaver Cloud

AI-powered machine translation built for the modern enterprise

Secure by design, highly scalable and infinitely adaptive,
Language Weaver Cloud is everything you need for instant translation.

State-of-the-art linguistic AI for enterprise needs

Global organizations must increasingly manage a fast-growing volume, velocity and variety of multilingual content. Customers expect immediate, multichannel interactions with your brand in their native language. Employees need to communicate and collaborate, no matter what language they speak. Only machine translation allows you to globalize content at scale, in real time, to meet these diverse, rapidly evolving needs.

With Language Weaver® Cloud, you can enjoy secure machine translation with rich functionality designed for the global enterprise, complete with a customized portal in your own brand, and single sign-on access. You can also use the solution's integration framework to embed it directly into your everyday applications.

Accuracy and ease of use

Language Weaver Cloud offers neural machine translation optimized for accuracy and fluency to provide a powerful solution for more than 3,000 language combinations. The modern, easy-to-use interface integrates easily with existing workflows and supports your file formats.

Security

Our secure-by-design technology framework means security is deeply and natively woven into every facet of the solution's architecture, development and policies. With Language Weaver Cloud, your data stays strictly within your control and is only used for your needs. Full auditability gives you clear visibility and control.

Adaptability

Intelligent adaptation allows for translation output that is fine-tuned to your specific requirements and contexts, reflecting your unique use of domain terminology, specialist vocabulary and brand style. Language Weaver Cloud supports the use of dictionaries, terminologies and brand lists, giving you control over the translation of terms and concepts that transcend language rules. You can also combine the power of direct user feedback, approval workflows and auto-adaptive capabilities to continuously enhance the performance of the solution for your needs.

Use Language Weaver Cloud for:

- Secure multilingual employee collaboration
- Broader eCommerce reach and market access
- Adding multilingual capabilities to communication and support channels
- Analysis and intelligence mining of multilingual content and data

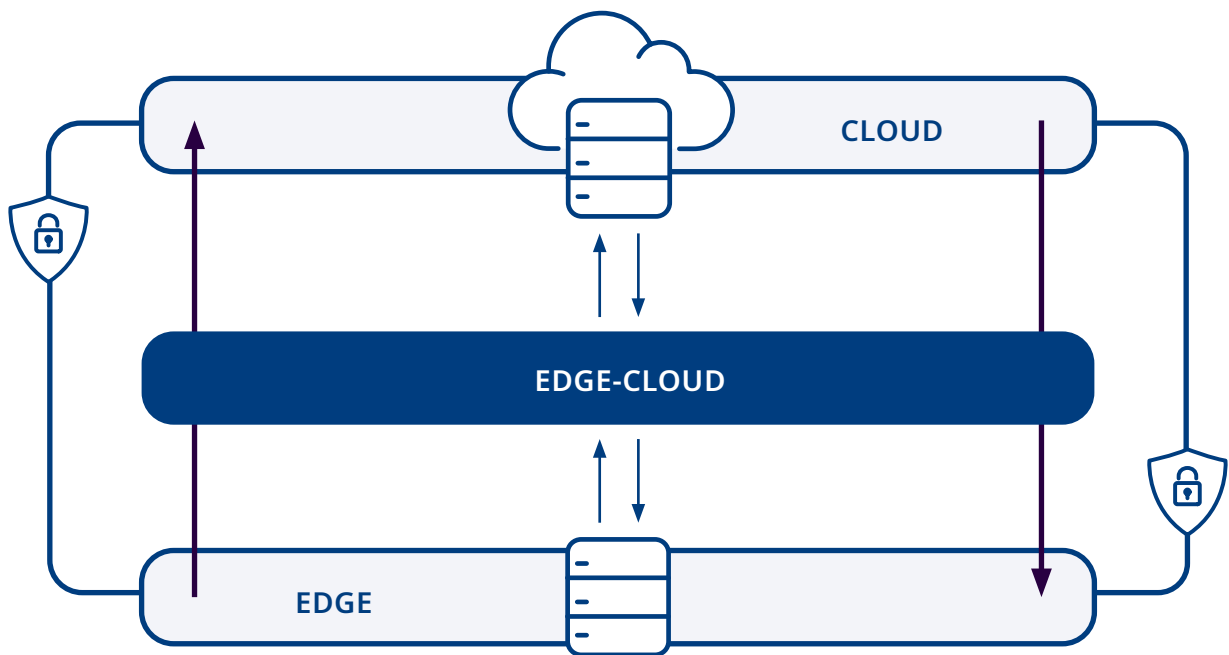

Deployment flexibility with hybrid architecture

Language Weaver offers unparalleled deployment flexibility via a hybrid edge-cloud architecture. If the cloud-only option is not enough for your organization, you can combine Language Weaver Cloud with a fully private environment provided by Language Weaver Edge, which is built to operate on-premises or in a private cloud, within the confines of a dedicated IT infrastructure. Both solutions offer the same advanced neural machine translation capabilities.

Language Weaver Cloud provides an on-demand environment that is easy to roll out for enterprise-wide use. While the cloud platform is secure by design, there are sometimes regulatory requirements that prohibit its use for highly sensitive documents.

A hybrid edge-cloud deployment lets you use the same environment for all your machine translation needs, without compromising security or accessibility.

Language Weaver Edge lets you secure sensitive tasks behind corporate firewalls and control performance with dynamic licensing and hardware optimization. It is built for volume.

Language Weaver Cloud features for your business

State-of-the-art machine translation and linguistic AI

- More than 3,000 language combinations (see our supported languages [here](#))
- Automatic language detection for a streamlined user experience
- Quality estimation to inform translation workflow decisions based on actionable data points
- Instant, automated summarization to aid and accelerate content analysis

Standout adaptive capabilities to tailor your AI

- Support for dictionaries and terminology lists to enforce key vocabulary such as brand names and industry- and domain-specific terms
- Direct user feedback to suggest better translations, with built-in approval workflows to improve the model and enjoy those improvements immediately
- Adaptive language pairs that leverage existing bilingual data and translation assets to create your own models
- Auto-adaptive language pairs to facilitate continuous and automated training of models from user feedback, dictionaries and translation memories

Real-time translation at your fingertips

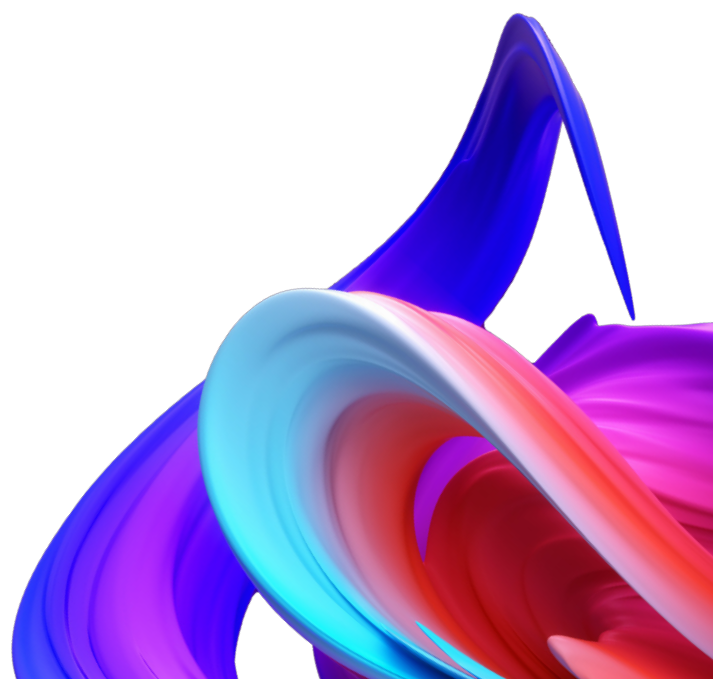

- Full power of Language Weaver seamlessly integrated into any existing systems, tools or workflows
- Full set of APIs, SDKs and out-of-the-box connectors to provide seamless interoperability and integration with your technology ecosystem

Enterprise-grade security to protect your greatest asset

- Data protection that is fundamentally and natively embedded within all layers of the Language Weaver architecture, development lifecycle and policies
- Fully segregated hosting in the EU and US, attuned to regional data protection laws
- Secure, encrypted communication protocol between client and platform
- Best-of-breed authentication mechanisms for secure API integration
- Strict role-based access controls to manage user permissions and access rights

Superior document handling capabilities

- Intuitive translation, editing and upload/download of documents within the portal
- Support for a wide range of document types with format preservation, minimizing re-work and time-wasting file conversions or text extractions
- Enhanced optical character recognition (OCR) with ABBYY
- Easy-to-use drag-and-drop features with integrated guidance

Why Language Weaver Cloud

With Language Weaver Cloud, your business users across the whole organization can enjoy:

- Breakthrough machine translation and linguistic AI to access new markets, reach global audiences and accelerate data-driven insights
- Real-time translation seamlessly integrated into existing tools, workflows and processes
- Complete confidence in data security and privacy
- Efficient outcomes through superior document handling and processing
- Improved communication and collaboration between internal teams across different languages and regions
- Continuously learning and improving AI technology that facilitates a virtuous circle of enhanced performance and productivity over time

And your central IT teams can rest assured that:

- With a minimal installation and maintenance burden and automatic upgrades to the latest functionality, you enjoy all the benefits of a cloud-based solution
- Easy deployment and scalability provide optimal flexibility as the organization and user base grow
- Tight security controls over confidential and proprietary data mitigate business risk
- Hassle-free integration means no complicated, error-prone overhaul of systems
- The intuitive user interface increases adoption across the organization
- Robust reporting allows for effective usage monitoring and optimization of the solution

Secure your AI advantage with Language Weaver Cloud

About RWS

RWS Holdings plc is a unique, world-leading provider of technology-enabled language, content and intellectual property services. Through content transformation and multilingual data analysis, our combination of AI-enabled technology and human expertise helps our clients to grow by ensuring they are understood anywhere, in any language.

Our purpose is unlocking global understanding. By combining cultural understanding, client understanding and technical understanding, our services and technology assist our clients to acquire and retain customers, deliver engaging user experiences, maintain compliance and gain actionable insights into their data and content.

Over the past 20 years we've been evolving our own AI solutions as well as helping clients to explore, build and use multilingual AI applications. With 40+ AI-related patents and more than 100 peer-reviewed papers, we have the experience and expertise to support clients on their AI journey.

We work with over 80% of the world's top 100 brands, more than three-quarters of Fortune's 20 'Most Admired Companies' and almost all of the top pharmaceutical companies, investment banks, law firms and patent filers. Our client base spans Europe, Asia Pacific and North and South America. Our 65+ global locations across five continents service clients in the automotive, chemical, financial, legal, medical, pharmaceutical, technology and telecommunications sectors.

Founded in 1958, RWS is headquartered in the UK and publicly listed on AIM, the London Stock Exchange regulated market (RWS.L).
