

RWS Multilingual eDiscovery Solution

Solution brief

Highly secure, efficient and flexible translation

Most law firms and eDiscovery experts find processing large volumes of multilingual discovery documents impractical and even impossible.

Highly secure, efficient and flexible translation solutions are increasingly important to ensure eDiscovery confidentiality and find relevant documents in multiple languages, all while controlling costs and improving efficiency.

How we can help

The RWS Multilingual eDiscovery Solution connects the award-winning neural machine translation solution, Language Weaver®, to Relativity®, a popular eDiscovery cloud solution for case management.

Customers are able to leverage automatic translation directly or add a more sophisticated workflow by taking advantage of the additional capabilities of MultiTrans® Translation Management System (TMS).

Using this solution, legal professionals and internal investigators can understand, navigate and classify foreign language documents quickly. Language Weaver automatically translates large volumes of content for more than 100 language pairs and supports additional requests from the Relativity workspace.

Support for a full range of legal documents:

- Arbitration documents
- Articles of Incorporation
- Court decisions and transcripts
- Expert reports and depositions
- Patent and trademark filings
- Foreign Corrupt Practices Act investigations
- Legal marketing materials
- Statement of objections
- Litigation and dispute documents
- Merger filings
- M&A filings
- Registration documents
- Insurance documents

...and more

eDiscovery service offerings

Machine translation

- Neural machine translation
- 120+ adaptable language pairs
- Secure by design
- Highly scalable and performant
- Machine-first, human-optimized
- Integrated OCR capabilities
- Use with MultiTrans Management System
- Integrated with Relativity via RWS Relativity Connector

Human translation optimization

- Translation, editing and revision (onsite and/or offsite)
- Back translation
- Sworn translation
- Foreign document review and summary

Court reporting

- Standard and real-time court reporting
- Simultaneous and consecutive interpretation
- Transcription
- Voice recognition

Solution architecture

The RWS Relativity Connector creates a way for users to tap into Language Weaver’s advanced neural machine translation capabilities easier. This solution includes:

1. Relativity – An easy to use, SaaS platform that brings the entire eDiscovery process together in a single solution
2. RWS Connector – Provides users with access to RWS’s secure, neural machine translation from the Relativity interface
3. Language Weaver – Advanced AI-enabled, secure neural machine translation solution
 - Connect Language Weaver® Edge if you need to maintain control of your data on-premises OR
 - Connect Language Weaver® Cloud for a secure cloud platform with reduced IT overhead
4. MultiTrans Translation Management System (TMS) is a secure translation management solution to streamline and manage machine-first, human-optimized translation workflows

Key benefits

- Protect your data with machine-to-machine security
- Gain control over translation project management and batch translations with just a few clicks
- Simplify content discovery
- Automate workflows
- Centralize content and increase ease of use
- Benefit from a vast range of high-quality linguistic services
- Secure, fast and high-quality translations across large volumes of content and document types
- Complete audit trail and reporting

Solution elements

Processing

Keywords and meta searches. We help you generate non-English keywords, improving the classification and relevant data extraction of non-English documents.

Machine translation optimization. We add translations of all keywords and phrases to our MT engine, improving the accuracy of automated translations in later stages.

Review

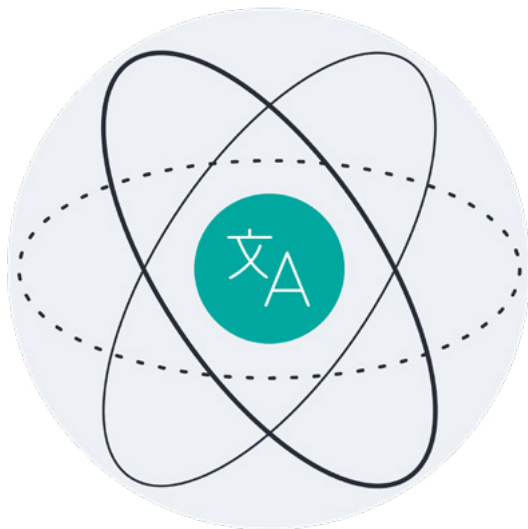

Automated translations via Relativity connector. Quick translation of non-English documents for review, simplifying the review process and allowing for English-only review.

Summarization. Summaries of non-English content in English to facilitate review, improving time to review and reducing cost.

Production

Professional translations. Only those documents deemed relevant to the case go through a full, professional translation.

Certification and notarization. We can provide the certification of notarization for translated documents.

Discover the benefits of working with RWS

Tailored solutions

Our range of services includes translation support designed to match the needs of each specific stage of eDiscovery. Options include:

- Fully automatic machine translation with fast turnarounds for the initial paper discovery, eDiscovery and document reviews.
- Machine translation with post-editing for higher quality translations.
- Onsite/offsite fully human translation for highly accurate translations.

ISO-certified processes

We are ISO 9001:2015 certified, and ISO 17100 and ISO 27001 compliant, which ensures our products and services meet your regulatory requirements.

RWS Relativity Connector

RWS provides a connector that integrates Language Weaver into the Relativity-supported workflow. This provides secure, automatic neural translation that can be optimized through an array of services.

Streamlined workflows without leaving the relativity environment

RWS's connector links our award-winning Language Weaver solution with Relativity. This integration provides a seamless user experience by creating a machine-first, human-optimized approach to multilingual eDiscovery.

Optimal project teams

With more than 2,100+ accredited legal linguists, RWS can undertake large-scale projects requiring dozens of industry expert translators to work simultaneously for timely completion. In addition, our specialized project managers have a variety of litigation backgrounds and experience working with Relativity.
